CAREER OBJECTIVE

Computer Science student at BRAC University with hands-on experience in full-stack web development through academic coursework, freelance client work, and self-driven production-grade projects. Seeking an internship where I can apply full-stack development skills, learn from experienced professionals, and contribute to real-world software solutions.

EDUCATION

B.Sc. in Computer Science and Engineering <i>BRAC University, Dhaka CGPA: Ongoing</i> Relevant Coursework: Software Engineering, Computer Networking, Data Structures, Algorithms, Database Systems, Operating Systems	2023 – Present
Higher Secondary Certificate (HSC), Science Group <i>Bangladesh Noubahini College, Dhaka</i>	2021
Secondary School Certificate (SSC), Science Group <i>Kurmitola High School and College, Dhaka</i>	2019

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C, C++, Java, HTML5, CSS
Frameworks: React.js, Next.js, Node.js, Express.js, Tailwind CSS
Databases: MongoDB, MySQL, PostgreSQL
Tools: Git, GitHub, Docker, VS Code, Cisco Packet Tracer, CI/CD
Networking: IPv4 Routing, DHCP, NAT/PAT, Static & Distance Vector Routing
Concepts: OOP, Design Patterns, REST APIs, MERN Stack, SDLC/Agile, Performance Optimization
Specializations: E-Commerce Development, Cross-Platform Web Apps, AI API Integration

PROJECTS

FuelFlow – Gas Station Management System (Production-Grade) - Built a full-stack gas station management platform using Next.js 15, TypeScript, Tailwind CSS, and MySQL - Implemented JWT-based authentication with custom route-protection middleware for secure, role-based access - Designed relational database schema and modules covering fuel orders, inventory tracking, staff attendance, and customer bookings/reservations - Built a customer review system and iterative database migration scripts to support evolving business requirements	2025
SurveyHub – Full-Stack Survey Platform - MERN stack web application for creating and managing online surveys with real-time result analytics - Implemented JWT-based authentication and dynamic form generation with a React/Vite frontend, Node.js/Express backend, and MongoDB	2025
Task Management Application - Developed a collaborative enterprise-grade task management system using Vue.js, Express.js, PostgreSQL, and WebSockets - Supported real-time updates, team management, and an advanced analytics dashboard	2024
Federal Flight Agency Network – Cisco Packet Tracer - Configured a multi-branch network for a CSE421 group assignment; responsible for the Maintenance Hangar branch - Implemented DHCP and static routing over serial/Gigabit links; verified end-to-end connectivity via ping, web, and email tests	2024

EXPERIENCE & ACTIVITIES

Freelance Web Developer - Developed custom full-stack websites for clients with a focus on performance, clean code, and user experience - Integrated AI APIs (Anthropic Claude) into client projects, enabling intelligent automation and conversational features	2024 – Present
BRAC University CS Club – Member Participated in coding competitions, hackathons, and tech workshops; collaborated on team-based development challenges	2023 – Present
