

Ashraful Haque Akash

Full Stack Developer | Web Architect | Problem Solver

 ashraful.haque.akash.w@gmail.com

 Dhaka, Bangladesh

 Portfolio: ashrafulhaque.com

PROFESSIONAL SUMMARY

Dedicated Computer Science undergraduate at BRAC University with strong expertise in full-stack web and mobile application development. Passionate about designing and implementing scalable, high-performance solutions using modern technologies. Equipped with solid computer science fundamentals, software architecture knowledge, and best practices. Committed to writing clean, maintainable code and creating exceptional user experiences. Based in Bangladesh with a proven track record of building production-grade applications.

CORE COMPETENCIES

Frontend Development

Languages: HTML5, CSS3, JavaScript, TypeScript
Frameworks: React, Vue.js, Tailwind CSS

Databases & Tools

Databases: MySQL, PostgreSQL, MongoDB
Tools: Git, Docker, CI/CD, Agile

Backend Development

Languages: Node.js, Python, JavaScript
Frameworks: Express, Django, REST APIs

Specializations

Cross-Platform: Mobile Development
Focus: Performance, Security, UX

FEATURED PROJECTS

E-Commerce Platform

Production-Grade Web Application

Technology Stack: React, Node.js, MongoDB, Stripe Payment Integration

Achievement: Built production-ready e-commerce platform handling 10K+ daily users with optimized performance and secure payment processing. Implemented advanced filtering, real-time inventory management, and responsive design.

Task Management Application

Enterprise-Grade Project Management Tool

Technology Stack: Vue.js, Express.js, PostgreSQL, WebSockets

Achievement: Developed collaborative task management system supporting 500+ concurrent users with real-time updates, team management, and advanced analytics dashboard.

Weather Application

Cross-Platform Mobile App

Technology Stack: React Native, Weather API, Offline Storage

Achievement: Created high-performance weather app optimized for mobile devices with offline support, geolocation tracking, and intuitive user interface. Focus on performance and user experience.

Social Media Analytics Dashboard

Advanced Analytics Platform

Technology Stack: React, Python, Data Visualization Libraries

Achievement: Designed and developed comprehensive analytics platform with predictive analytics, real-time data visualization, and actionable insights for social media management.

TECHNICAL EXPERTISE

- **Full Stack Development:** End-to-end application development from frontend UI to backend APIs and database design
- **Software Architecture:** Design patterns, microservices, scalable system architecture
- **Cross-Platform Development:** Web and mobile application development with code reusability
- **Performance Optimization:** Code optimization, caching strategies, database optimization, SEO
- **Security Implementation:** Authentication, authorization, data encryption, secure API design
- **Testing & Quality Assurance:** Unit testing, integration testing, debugging, QA best practices
- **Version Control & CI/CD:** Git workflows, automated testing, continuous deployment
- **Problem Solving:** Data structures, algorithms, complex problem analysis and solutions

EDUCATION

Bachelor of Science in Computer Science

Currently Enrolled

BRAC University, Dhaka, Bangladesh

Pursuing undergraduate degree in Computer Science with focus on full-stack development, software architecture, and system design. Comprehensive coursework covering algorithms, data structures, software engineering, database systems, web technologies, and mobile application development.

Higher Secondary Certificate (HSC)

Bangladesh Noubahini College, Dhaka, Bangladesh

Advanced studies in Science stream with strong foundation in Physics, Chemistry, and Mathematics.

Secondary School Certificate (SSC)

Kurmitola High School and College, Dhaka, Bangladesh

Foundation education in Science stream with excellent academic performance.

PROFESSIONAL QUALITIES

- **Clean Code Advocate:** Writes maintainable, well-documented, and easily understandable code

- **Continuous Learner:** Stays updated with latest technologies and best practices in web development
- **Attention to Detail:** Meticulous about code quality, performance, and user experience
- **Problem Solver:** Analytical approach to solving complex technical challenges
- **Collaboration:** Strong communication and teamwork skills
- **User-Focused:** Prioritizes creating exceptional user experiences in all projects
